

REVISED 3-10-2022

**How to Make the NEW stanchions for the
Diminishing Clearance Event**

To make 10 stanchions for this event you will need the following items:

- 6 - 10' x 3/4" PVC Pipes
- 10 - 3/4" side outlet elbows
- 20 - 3/4" 90 - degree elbows
- 20 - 1" caps
- 1 - roll of RED duct tape
- PVC pipe glue

You will need to cut: 10 - 4' sections of PVC Pipe and 20 - 1' sections of PVC Pipe from the 6 pieces of 10' PVC Pipes

I suggest that when you have finished assembling the stanchions and the glue has dried that you either fill them halfway up the four-foot pole with either water or sand and that will eliminate the need for sandbags on the feet. I like using water because when you are finished you just pour it out and store them away.
